ABOUT ME

A recent Software Engineering graduate with hands-on experience in web development, focusing on building clean, scalable and user-friendly interfaces. Skilled in Next.js, React, TypeScript and TailwindCSS, with good knowledge of backend technologies including Node.js, Express, and MongoDB. My work is showcased on my [Portfolio](#). I am excited about the opportunity to learn and grow as a Frontend Developer, with the goal of becoming a Fullstack Developer in the future.

EDUCATION

Ho Chi Minh City University of Technology and Education

Bachelor of Engineering (B.Eng.) in Software Engineering

Ho Chi Minh City, Vietnam

September 2020 - December 2024

SKILLS

Languages	HTML, CSS, JavaScript, TypeScript, Microsoft SQL Server, MySQL
Frontend	React, Next.js, TailwindCSS
Backend	Node.js, Express, RESTful APIs
Database	MongoDB, PostgreSQL
Tools	Git, npm, Yarn, Postman, VS Code
Other Skills	Data Structures & Algorithms, Object-Oriented Programming

PROJECTS

Watches Store (Final Year Project)

[GitHub](#)

- Team size: 2
- My role: Team Leader, Frontend Developer
- Technologies Used: React, Redux Toolkit, Ant Design, TailwindCSS, Framer Motion, Recharts, Firebase, Google OAuth, Cloudinary
- Short description: Built a comprehensive e-commerce platform with separate customer and admin interfaces, featuring advanced UI components and real-time data visualization.
- Key Contributions:
 - Led project planning and coordinated team tasks throughout development.
 - Built user-friendly customer interface with product pages, shopping cart, profile page, and payment.
 - Created admin dashboard for managing products, orders, users, ... and viewing sales reports.
 - Used Recharts to create clear sales charts and data displays for admin.

Personal Blog Application

[GitHub](#)

- Team size: 1 - [Link demo project](#)
- Short description: Built a web blog application with user authentication and admin management features using modern web technologies.
- Technologies: MongoDB, Express, React, Node.js, TailwindCSS, JSON Web Tokens, Redux Toolkit
- Features:
 - User Authentication: Secure login and registration with JWT tokens.
 - Admin Dashboard: Manage blog posts, users, comments and settings.
 - CRUD Operations: Create, read, update, and delete blog posts.

User Authentication System

GitHub

- Team size: 1 - [Link demo project](#)
- Short description: Built a complete authentication system with email/password login, Google login, and password recovery features.
- Technologies: React, TailwindCSS, Zustand, Lucide Icon, Node, Express, MongoDB
- Features:
 - User login and logout with secure sessions.
 - Email verification for new user accounts.
 - Password reset via secure email links.
 - Password update functionality for user accounts.

CERTIFICATE

- Ets Toeic Official Score Certificate (Reading and Listening): 670
- Big Data Machine Learning Fundamentals (2 Feb, 2023)
- Google Cloud Training Day (30th August, 2022)

INTERESTS

- Running, Football, Technology News & Trends
